**Healthcare Knowledge** | Clinical Workflow, Medical Terminology, HIPAA

**EHR Systems** | Cerner, EPIC, Centricity

## COURSEWORK & PROJECTS

- Applied Python, R, and SQL extensively in graduate level projects and assignments.
- Currently conducting a Python based data mining project to build a classification model to identify diabetes risk using lifestyle indicators.
- Analyzed COVID-19 deaths & comorbidities using R and Altair.
- Applied dplyr and tidyverse in R to clean and analyze shooting incident data in NYC.
- Created a relational database model for a simulated primary care business.

## WORK EXPERIENCE

<b>DaVita Integrated Kidney Care</b> , Pompano Beach, FL (Remote) <i>Integrated Care Assistant II</i>	<b>April 2023 – Current</b>
--	-----------------------------

- Obtained, verified, and maintained patient data in the EHR system, for CKD and ESKD patients within the DIKC/Village Health program, ensuring accuracy and completeness of medical records.
- Tracked hospital admissions and discharges and communicated regularly with the Integrated Kidney Care (IKC) team to support care management and timely patient follow-up.
- Led multiple Excel training sessions for team members, improving data entry accuracy and reporting efficiency across IKCA teams.

<b>Segall Foot and Ankle</b> , Fort Lauderdale, FL <i>Medical Administrative Assistant &amp; Receptionist</i>	<b>Aug 2022 – Dec 2022</b>
--	----------------------------

- Managed front-office workflow by checking in patients, verifying insurance, scheduling appointments, and maintaining accurate medical records. Handled high volumes of phone calls, patient correspondence, and clinical documentation with strong attention to detail and data accuracy.
- Supported providers by organizing patient information, processing faxes and results, and ensuring timely updates to the electronic health record.

<b>Scribe-X</b> , Oakland, CA (Remote)	<b>Feb 2022 – May 2022</b>
--	----------------------------

*Dermatology Medical Scribe*

- Documented up to 30 patient encounters per day in SOAP format, ensuring accurate, complete, and real-time clinical data capture in the EHR.
- Supported clinical workflows by preparing charts, entering orders, and monitoring quality metrics to maintain reporting accuracy and compliance. Collaborated with providers to review and validate documentation, enhancing data integrity and improving overall chart quality.

<b>Scripps Clinic Torrey Pines</b> , La Jolla, CA <i>Clinical Medical Assistant</i>	<b>May 2021 – Nov 2021</b>
--	----------------------------

- Directly cared for patients by rooming, discharging, and collecting clinical information. Documented patient histories, concerns, and care in the EHR (Epic), maintaining accurate and complete data for physician review and follow-up.
- Coordinated referrals, messages, and appointments to support seamless patient care and efficient clinic workflows. Assisted with various outpatient procedures and exams, obtained vital signs, and conducted ECGs, phlebotomy, and vaccinations.
